

BOMBA CONTRAINCENDIO

**SKID MOUNTED
FIRE PUMP PACKAGE**

QUIENES SOMOS / ABOUT GENERAL PUMPS

- Somos una empresa de fabricación, distribución y exportación de Bombas y motores eléctricos con más de 30 años de experiencia en el mercado nacional e internacional, lo cual ha contribuido al éxito alcanzado por nuestra empresa a día de hoy.
- Nuestra producción cubre una amplia gama de posibilidades, convirtiéndose en una de las pocas compañías que ofrece soluciones completas de bombeo para sus clientes en diferentes sectores, geográficos regiones, temperaturas y tipología del agua.
- Estamos ubicados en Valencia (España) en una ciudad portuaria, específicamente en el Parque Industrial "El Oliveral" en Ribarroja del Turia, contamos con una extensión de más de 5000m² y adicionalmente instalaciones de prueba de aproximadamente 2000 m² de avanzada tecnología para ofrecer productos de alta calidad.
- Gracias a nuestra amplia gama de productos, estamos representados a través de nuestros clientes en los 5 continentes, destacando en los campos tales como agricultura, construcción, industria, equipos de presión y soluciones contra incendio.
- También contamos con un equipo altamente calificado para ofrecer el máximo profesionalismo en soluciones específicas para diferentes sectores.
- En resumen, General Pumps ofrece soluciones hidráulicas con la mejor relación calidad / precio del mercado con excelente servicio y una respuesta inmediata.

- We are a manufacturing, distribution and export company of pumps and electric motors with more than 30 years of experience in the national and international market, which has contributed to the success achieved by our company today.
- Our production covers a wide range of possibilities, becoming one of the few companies that offers complete pumping solutions for its clients in different sectors, geographical regions, temperatures and water typology
- We are located in Valencia, Spain, in a seaport city, specifically in the Industrial Park "El Oliveral" in Ribarroja del Turia, with an extension of more than 5000m² and additionally we have a test facilities of approximately 2000 m² that has advanced technology for offer top quality products.
- Thanks to our very wide range of products, we are represented through our clients in the 5 continents, standing out in fields such as agriculture, industry, construction.
- We also have a highly qualified team to offer maximum professionalism in specific solutions for different sectors.
- In short, General Pumps offers hydraulic solutions with the best quality / price ratio in the market with excellent service and an immediate response.

Certificado ISO

ZERTIKAT • CERTIFICATE • 認証証書 • CERTIFICATO • CERTIFICADO • CERTIFICAT

CERTIFICATE

The Certification Body
of TÜV SÜD South Asia Private Limited
certifies that

GENERAL PUMPS SLU
Pol. Ind. El Oliveral. (U.E. 7 Nave 1), C/W Ribarroja de Turia
46394 Valencia
Spain

has implemented Quality Management System
in accordance with ISO 9001:2015
for the scope of

1) Manufacturing and Sales of Submersible Pump Sets, Centrifugal Pump Sets, Horizontal Split Casing Pump Sets, End Suction Pump Sets, Vertical Multi Stage Pump Sets, Induction Motors

2) Sales and Supply of Solar Photovoltaic Panels

The certificate is valid from 2021-07-21 until 2024-07-20

Subject to successful complete annual periodic audit.

The present state of this Certificate can be obtained at www.tuv-sud.com

Further clarifications regarding the scope of this certificate may be obtained by contacting the certification body

Certificate Registration No. 99 100 15663

Date of initial certification: 2012-07-21

Issue date: 2021-06-07 Rev. 00

Head of Certification Body
of TÜV SÜD South Asia Private Limited, Mumbai
Member of TÜV SÜD Group

TÜV SÜD South Asia Pvt. Ltd./TÜV Süd India Noida Andheri (East) Mumbai - 400072, Maharashtra, India TÜV®

Certificate of Compliance

This certificate is issued for the following:

Centrifugal Fire Pumps (Horizontal Split-Case Type)

Models FGBS-125-100-250, FGBS-125-100-315, FGBS-150-125-250
FGBS-180-145-250, FGBS-125-100-250, FGBS-150-125-315
(see attached listing)

Prepared for:

General Pumps S.L.
Pol. Ind. El Oliveral (U.E. 7 Nave 1) C/W
46394 Ribarroja del Turia
Valencia, Spain

FM Approvals Class: 1319

Approval Identification: PR457196 Approval Granted: December 11, 2018

To verify the product continues to be Approved please refer to www.approvalguide.com

Said Approval is subject to satisfactory field performance, continuing Surveillance Audit, and strict conformity to the constructions as shown in the Approval Guide, an online resource of FM Approvals.

SET CONTRAINCENDIO FIRE PUMP PACKAGE

- El equipo de bombeo contra incendios de General Pumps incorpora bombas, motores eléctricos, motores diésel, válvulas, colectores, interruptores de presión y paneles de control.
- Fabricado según UNE 23500 : 2012, UNE 23500 : 2018, Cepreven RT 2 ABA
- A General Pumps Fire Pump package is a fully assembled skid mounted pumping system with fire pumps, electric motors, diesel engines, valves, manifold, pressure switches and control panels.
- Manufactured according to UNE 23500 : 2012, UNE 23500 : 2018, Cepreven RT 2 ABA

Como funciona

- En caso de incendio, generalmente se inicia la demanda de agua o bien por la apertura de un hidrante o bien por el inicio automático de rociadores fijos, la repentina caída de presión en el sistema contra incendios causa que la bomba principal se inicie automáticamente para proporcionar el flujo de agua necesario a los puntos de aplicación.
- Las bombas principales están diseñadas para proporcionar suministro de agua a presión para la lucha contra incendios; éstas pueden iniciarse manual o automáticamente según se requiera.
- En estos sistemas contraincendios (Set contraincendio), normalmente se utilizan las bombas de eje libre o bombas verticales como principales y las bombas Jockey deben de tipo vertical.

How it works

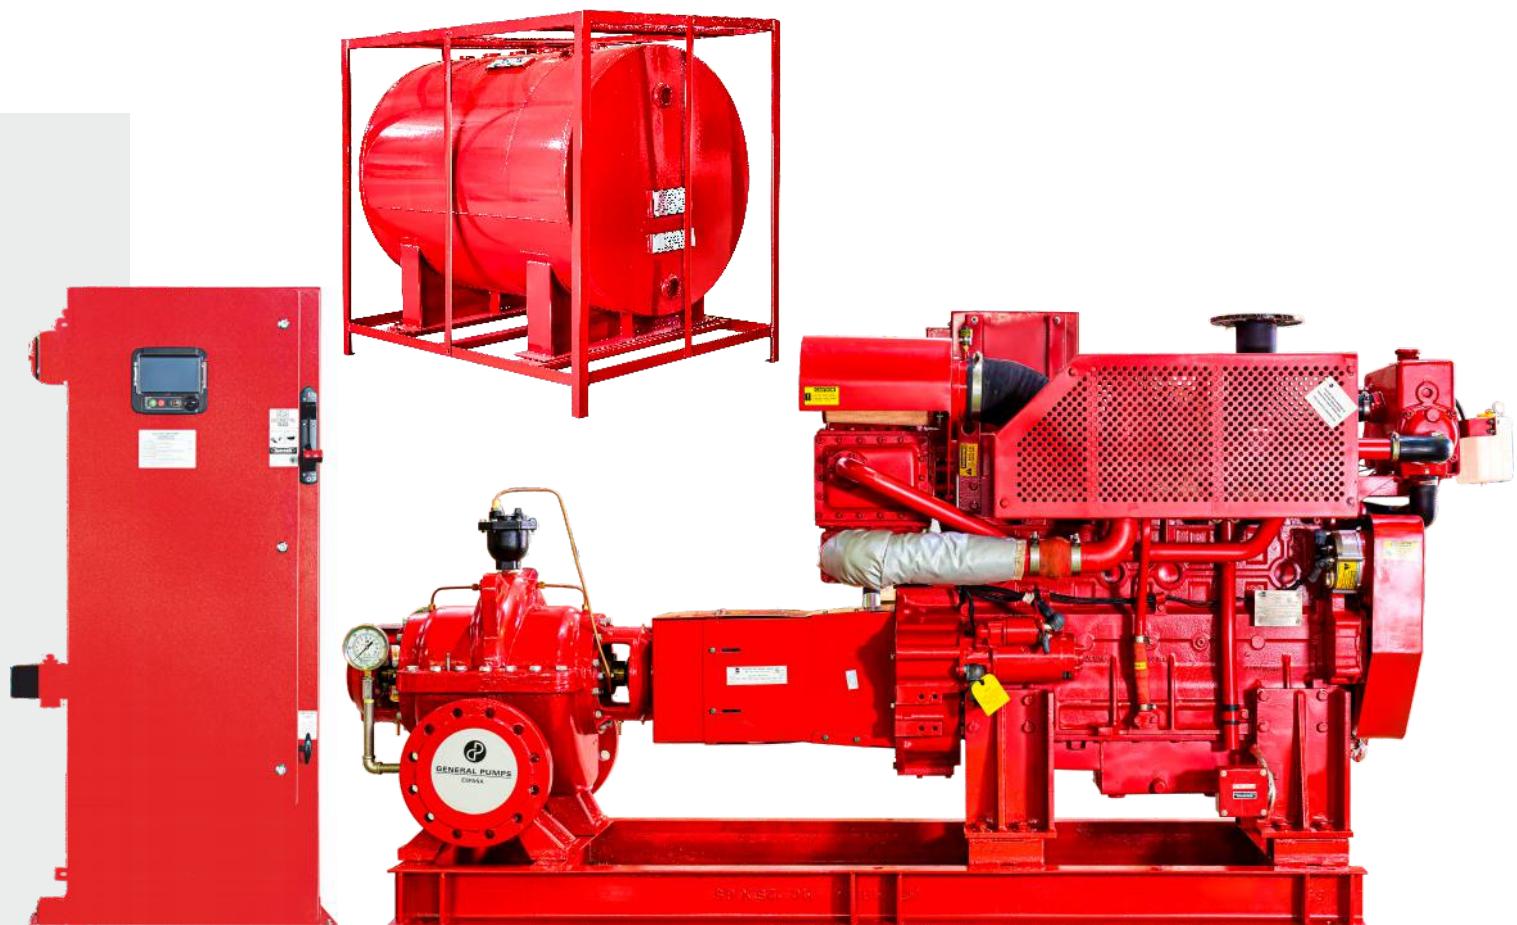

- In the event of a fire, either the opening of a fire hydrant or the automatic initiation of a fixed sprinklers installation usually initiates the demand for water. The sudden fall in pressure in the fire system rising main causes the main pump to automatically start and provide the required flow of water to the points of application.
- The main pumps are designed and manufactured to provide pressurized water to fire fighting system and they can be manually or automatically started.
- In these fire Pump packaged units End Suction Pumps or Vertical multistage Pumps are used as main pumps. Jockey Pumps shall be Vertical Multistage Pumps.

General Pumps ofrece bombas de carcasa partida horizontal de una y dos etapas con diseño robusto para aplicaciones antincendios que van desde 20 m³/hr hasta 2700 m³/hr. Las bombas están diseñadas para manejar presiones de hasta 16 bar. Podemos ofrecer las bombas en combinación de motor eléctrico con motor diésel. Las bombas se pueden suministrar con diferentes materiales de construcción, como combinaciones de hierro fundido, bronce y acero inoxidable.

General Pumps offers highly efficient with robust design single-stage and two-stage horizontal split case pumps for fire fighting applications which range from 20 m³/hr to 2700 m³/hr. The pumps are ideally designed to handle pressure up to 16 Bar. These pumps can be offered in the combination of Electric Motor Driven with Diesel Engine Driven set. The pumps can be supplied with different material of constructions such as Cast Iron, Bronze and Stainless Steel combinations

GENERAL PUMPS
ESPAÑA

Bomba Principal

La bomba principal está diseñada para suministrar el flujo de agua especificado a una presión determinada por los requisitos del sistema contra incendio. Debe ser capaz de entregar un mínimo del 140% del flujo nominal a no menos del 70% de su presión nominal.

El impulsor y los anillos de desgaste serán de bronce y el eje de la bomba es de material de acero inoxidable.

Para los manómetros de succión y descarga, éstos deberán tener puertos roscados cerca de la succión y suministro bridas. La bomba debe tener un puerto de drenaje roscado en la parte inferior de la carcasa para drenar la bomba durante mantenimiento.

La bomba tendrá un diseño de extracción posterior para permitir que las partes giratorias sean removidas y mantenidas sin desmontar la tubería de aspiración y descarga.

Main Pump

The main pump is designed to deliver the specified flow of water at a pressure determined by the requirements of the Fire Fighting system. It must be capable of discharging a minimum of 140% of the rated flow at not less than 70% of its rated pressure.

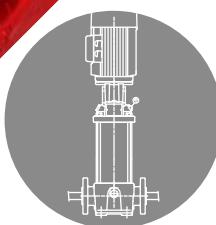

The impeller and wear rings shall be of bronze and the pump shaft is of stainless steel material.

For installing suction and discharge pressure gauges, it shall have threaded ports near suction and delivery flanges. The pump shall have a threaded drain port at the bottom of casing for draining the pump during maintenance.

The pump shall have back pull out design so as to enable the rotating parts to be removed and serviced without dismantling the suction and discharge pipe work.

Bomba Jockey

La bomba jockey es una vertical de múltiples etapas. Bomba de tipo centrífugo, que se utiliza para mantener la presión en la red. El arranque y la parada es controlado automáticamente por medio de interruptores de presión.

Jockey Pump

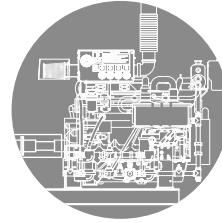

The jockey pump is a vertical multi-stage centrifugal type pump, which is used for maintaining the pressure in the fire-fighting system. The starting and stopping is automatically controlled by means of pressure switches.

Motor Diesel

El motor se suministra con los siguientes elementos:

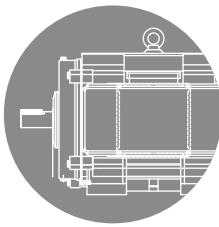

- Depósito de combustible.
- Dos juegos de baterías de arranque (el voltaje de la batería puede ser de 12 o 24 V).
- Filtros de aire, aceite y combustible.
- Silenciador de escape y conector flexible para el colector de escape del motor.
- La refrigeración del motor puede ser por los siguientes medios
- Detector e indicador de velocidad de proximidad.
- Indicador de temperatura del motor con alta alarma de advertencia de temperatura.
- Indicador de presión de aceite con bajo nivel de aceite. alarma de advertencia de presión.

Diesel Engine

The engine is supplied with the following items:

- Fuel tank.
- Two sets of starting batteries (battery voltage shall be 12 volts DC.).
- Air, oil and fuel filters.
- Exhaust silencer and flexible connector for the engine exhaust manifold.
- Engine cooling shall be by Heat Exchanger
- Proximity Speed detector and indicator.
- Engine Temperature Indicator with high temperature warning alarm.
- Oil Pressure indicator with low oil pressure warning alarm.

Motor Electrico

Estos son AC, trifásico, “jaula de ardilla”, 415 voltios, 50 Hz, servicio S1, clase F, motores de inducción IP55.

Características

- Los motores están equipados con una matriz de aluminio equilibrada dinámicamente. Rotores de la jaula de ardilla.
- Los motores están equipados con rodamientos de bolas antifricción pre-lubricados
- Los motores están libres de humedad y partículas de polvo.
- Pérdidas mínimas del rotor debido al uso de grado electrolítico de aluminio.
- Pérdidas mínimas de cobre debido al uso de grado electrolítico de cobre.
- Mínimas pérdidas por fricción.
- Bajo ruido, motor de marcha suave.

Electric Motor

These are AC, three-phase, squirrel cage, 415 volts, 50 Hz, S1 duty, F class, IP 55 induction motors.

Features

- Motors are fitted with dynamically balanced aluminium die cast squirrel cage rotors.
- Motors are fitted with pre-lubricated antifriction ball bearings
- Motors are free from moisture and dust particles.
- Minimum rotor losses due to use of electrolytic grade of aluminum.
- Minimum copper losses due to use of electrolytic grade of copper.
- Minimum friction losses.
- Low noise, smooth running motor.

UNE : 23500

Esta norma establece los requisitos para los sistemas de suministro de agua utilizados en la extinción de incendios.

This standard establishes the requirements for water supply systems used for the supply of specific fire extinguishing systems.

Rendimiento / Características Hidráulicas:

La bomba principal de ser capaz de cubrir el 140% del flujo nominal a una presión no inferior al 70% de la presión nominal.

Performance / Hydraulic characteristics:

The main pump is able to drive 140% of the nominal flow of the pump at a pressure not less than 70% of the nominal pressure.

Material De Construcción:

- El cuerpo de la bomba es hierro fundido o una aleación de metal con propiedades físicas y mecánicas equivalentes.
- El material del impulsor es bronce o acero inoxidable fundido en una sola pieza o una aleación de metal con propiedades físicas y mecánicas con equivalentes.
- El anillo de desgaste de la bomba es de hierro fundido o equivalente. El eje de la bomba es de material de acero inoxidable.
- El sellado de la bomba es con empaquetadura de prensa estopa.

Material of construction:

- The pump body is of cast iron or a metal alloy with physical and mechanical properties equivalent.
- The impeller material is bronze or stainless steel cast in one piece or a metal alloy physical and mechanical properties with equivalent.
- Pump wear ring is of cast iron or equivalent. The pump shaft is of stainless steel material.
- Pump sealing is either with gland packing.

Sistemas Basados En La Norma UNE 23500 / Combinaciones

Systems based on UNE 23500 Standard with following system / Combinations

- El sistema consta de 1 bomba eléctrica y 1 bomba jockey
- El sistema consta de 2 bombas eléctricas y 1 bomba jockey
- El sistema consta de 1 bomba diesel y 1 bomba jockey
- El sistema consta de 1 bomba eléctrica, 1 diesel y 1 bomba jockey
- System consists of 1 electrical and 1 jockey pump
- System consists of 2 electrical and 1 jockey pump
- System consists of 1 diesel and 1 jockey pump
- System consists of 1 electrical, 1 diesel and 1 jockey pump

Leyenda :

- D - Bomba contra incendios accionada por motor diesel
- E - Bomba contra incendios accionada por motor eléctrico
- J - Bomba Jockey

Nuestras combinaciones:
